EDUCATION

Holy Angel University | Angeles City, Pampanga **Expected Graduation April 2027**

B.S. in Computer Science, | GWA: 1.21

- **Relevant Courses:** Systems Integration, Data Analytics, Intelligent Systems, Data Structures and Algorithms

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, CSS, Dart

Frameworks and Libraries: React.js, Node.js, Flutter, Tailwind CSS, PyTorch, Pandas, scikit-learn, Matplotlib

Tools and Cloud: Git, Docker, AWS (EC2, VPC, IAM), Supabase, OpenAI API, VS Code, MS Office

RELEVANT EXPERIENCE

Holy Angel University | Angeles City, Pampanga **June 2026 – October 2026**

Student Researcher

- Developed a real-time volleyball referee whistle detector in Python (scikit-learn), combining (SVM, Random Forest, Gradient Boosting) trained on 1,930 audio clips, achieving 98% accuracy on unseen data
- Validated on recordings from venues it had never seen, using grouped cross-validation to avoid overfitting, and added a noise filter that reduced false detections in live use
- Packaged and deployed the system with Docker for user testing, detecting 86% of whistles with no false positives

School of Computing Student Council | Angeles City, Pampanga **Feb. 2024 - April 2025**

External Communications Staff Member

- Designed promotional and informative posters, publication materials for collegiate and department events using Illustrator, Photoshop, InDesign, and Canva
- Designed official student council merchandise using Illustrator and Clip Studio Paint, selling around 100 units in total

PROJECTS

JeepMiyabe – Jeepney Route Finder (Flutter) | *Full-Stack Mobile Application* | [LINK] **October 2025**

- Developed a cross-platform mobile app to help commuters navigate 11 official jeepney routes in Angeles City
- Implemented Dijkstra's algorithm to recommend routes based on distance, travel time, and transfer costs
- Integrated google Maps and GPS to visualize routes, track user location, and select destinations
- Added Supabase authentication and favorite destinations to support personalized user experiences

Helmet Violation Detection System (YOLOv8) | *Computer Vision* | [LINK] **October 2026**

- Built a motorcycle helmet-violation detector for CCTV and close-range video, reaching 85% detection accuracy on 2,363 unseen test images, by training YOLOv8 on two public datasets
- Logged each unhelmeted motorcycle once with a cropped photo, timestamp, and confidence score, using ByteTrack tracking and SQLite

LEADERSHIP EXPERIENCE

League of Outstanding Programmers | Angeles City, Pampanga **May 2024 – March 2025**

Head Creative Director

- Headed a creative team producing publication materials for social media and collegiate events, including posters, pamphlets, and event booth collaterals using Illustrator, Photoshop, and InDesign
- Spearheaded a full organizational rebrand and designed the official uniform, from concept to final output
- Conceptualized and illustrated official merchandise using Clip Studio Paint and Illustrator, producing and selling more than 100 units

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations - *Amazon Web Services* [LINK] **March 20, 2025**

CompTIA IT Fundamentals+ (ITF+) Certification – *CompTIA* [LINK] **November 23, 2023**
